

One Source for Precision Fibrous Parts

SPARTAN OMNI-GRAY

DESCRIPTION:	A fibrous non-woven material with excellent surface wear resistance, high liquid absorbing ability and good resistance to shear mechanical stresses. It has a textured gray appearance with micro voids for improved slurry distribution. A highly durable, cross functional pad.
FOR USE ON:	Sapphire, silicon carbide, silicon wafers
DUROMETER:	55-60 (Scale C)
COMPRESSION:	10-12% (4 lbs. force displacement)
DENSITY:	0.270-0.330 g/cm ³
THICKNESS:	0.050", 0.090", 0.125"
SURFACE:	Plain, embossed, or grooved
DIAMETER:	Up To 60" Sheets or Pads
BACKING:	Plain or PSA
CAN REPLACE:	Suba IC series pads
