

One Source for Precision Fibrous Parts

## SPARTAN OMNI-WHITE

DESCRIPTION:	A fibrous non-woven material with excellent surface wear resistance, high liquid absorbing ability and good resistance to shear mechanical stresses. It has a textured white appearance with micro voids for improved slurry distribution. A highly durable, cross functional pad.
FOR USE ON:	Optical, electro-optical, metals, semiconductor, compound semiconductor and ceramic materials as a gentle stock removal pad or a final polishing pad.
DUROMETER:	55-60 (Scale C)
COMPRESSION:	11-13% (4 lbs. force displacement)
DENSITY:	0.383-0.468 g/cm <sup>3</sup>
THICKNESS:	0.050", 0.090", 0.125"
SURFACE:	Plain, embossed, or perforated
DIAMETER:	Plain or Embossed up to 60"; Perforated up to 55.5"
BACKING:	Plain, PSA or Backer Pad
