

One Source for Precision Fibrous Parts

SPARTAN WARRIOR

DESCRIPTION: The Spartan Warrior Pad is a one-step, special non-woven pad best used as an intermediate/final pad when used with the proper slurry compositions in each material category. Spartan employs a chemical/mechanical process that enhances cross-linking action between the various fibers and active chemistry resulting in a more durable bulk polishing substrate. Overall material compressibility provides a better "*pumping action*" due to a combination of pore/fiber structure and fixed chemistry.

FOR USE ON: The Spartan Warrior Pad is a versatile pad and can be used for most polishing applications by adjusting the polishing process variable parameter.

DUROMETER: 42 (Scale C)

COMPRESSION: 5% (4 lb. force displacement)

DENSITY: .326 g/cm³

THICKNESS: 0.090"-0.220"

SURFACE: Perforated or Embossed up to 36"

DIAMETER: Up To 60" Sheets or Pads

BACKINGS: Plain, PSA or Backer Pad

EXPERIENCE: Spartan Felt Company has approximately 40 years experience in the polishing and surface preparation industry. When you deal with Spartan Polishing Pad Division, you are assured of dealing with professionals who understand the polishing problems you encounter every day. Our experts don't stop until they have found creative solutions to help you.
